ARCTIC F8 PWM PST - 80 mm PWM PST Case Fan with PWM Sha

SKU / Model: ACFAN00204A

Product overview

ARCTIC F8 PWM PST - 80 mm Long Service Life The Fluid Dynamic Bearing comes with an oil capsule that avoids lubricant leakage. Thus this bearing is as quiet as a sleeve bearing but comes with a significantly higher service life Innovative Design Enables Quiet and Efficient Ventilation The innovative design of the fan blades improves the air flow and facilitates a highly efficient ventilation. The impeller was designed with a focus on minimzing the noise level yet delivering the desired airflow and pressure. PWM Sharing Technology (PST) Lowers Noise If you want to improve the cooling efficiency of your computer you get several case fans working in parallel (since it takes 10 fans to double the noise level). But what does it help if they don’t work together? The PST assures that all of your fans listen to one control signal. E.g. you share the CPU Cooler’s PWM signal and assure that your case fans stand down at low load and spin up whenever necessary SPECIFICATIONS Brand Arctic Fan Size 80mm Lighting None RPM PWM Frame Colour Black Blade Colour Black No. of Fans 1
