ARCTIC MX-6 Ultimate Performance Thermal Paste (8g)

SKU / Model: ACTCP00081A

Product overview

ARCTIC MX-6 Ultimate Performance Thermal Paste (8g) The ARCTIC MX-6 is a high-performance thermal paste designed for optimal heat transfer between CPUs, GPUs, and heatsinks. Building upon the success of its predecessor, MX-4, the MX-6 offers improved thermal conductivity and long-term stability. Its carbon-based formula ensures efficient heat dissipation without the use of metallic particles, making it non-conductive and safe for electronic components. The paste is easy to apply, does not require a burn-in period, and maintains its performance over extended periods. It’s suitable for a wide range of applications, including PCs, consoles, laptops, and direct-die cooling scenarios SPECIFICATIONS Model Number: ACTCP00081A Weight: 8 grams Color: Grey Viscosity: 45,000 poise Density: 2.6 g/cm‡ Continuous Use Temperature: -50℃ to 150℃ Volume Resistivity: 1.8 ×10„† ?•cm Breakdown Voltage: 7.5 kV/mm Thermal Conductivity: Not specified Electrical Conductivity: Non-conductive Capacitance: Non-capacitive
