

EVGA CLC360 AIO 360mm cooler

SKU / Model: 400-HY-CL36-V1

Product overview

Product as the Hero The EVGA CLC360 AIO 360mm liquid cooler is engineered to provide extreme cooling performance for high-end CPUs, ensuring peak efficiency under demanding workloads. Its 360mm radiator with three 120mm fans delivers exceptional heat dissipation, keeping your processor cool during extended gaming sessions or intensive rendering tasks. The closed-loop all-in-one design eliminates the need for custom liquid cooling maintenance, offering a pre-filled, sealed, and leak-free solution. A high-performance pump circulates coolant efficiently, reducing hot spots and maintaining stable CPU temperatures across the board. Compatible with a wide range of Intel and AMD sockets, installation is versatile and convenient. Low-noise fans ensure maximum cooling power without creating distracting system noise. The cooler's sleek black design with an integrated LED logo adds a premium aesthetic to any build. Its large radiator surface area ensures uniform heat distribution, preventing thermal throttling and enhancing system reliability. EVGA's quality standards guarantee durability, reliability, and consistent long-term performance. Advanced thermal monitoring dynamically adjusts fan speeds for optimal cooling efficiency. The compact pump design maintains clearance for RAM and other components. High-quality tubing resists kinks and degradation, ensuring reliable performance over time. Whether for gaming, video editing, or scientific computation, the CLC360 keeps your CPU protected and efficient. This cooler provides the ideal combination of performance, quiet operation, and premium design for enthusiast builds. With the EVGA CLC360, your system maintains maximum performance without compromise, keeping temperatures low and operations smooth.

Key Features -> 360mm radiator with three 120mm fans for superior heat dissipation -> Closed-loop liquid cooling design for maintenance-free operation -> High-performance pump for consistent CPU cooling -> Compatible with Intel and AMD sockets -> Low-noise fans for quiet operation -> Pre-filled and sealed for easy installation -> Sleek black design with integrated LED logo -> Large radiator surface area ensures stable thermal performance -> Advanced thermal monitoring for dynamic fan control -> Durable tubing resistant to kinks and long-term degradation

Customer Benefit ? Keep CPU cool maintains low temperatures during intensive workloads ? Stable performance prevents throttling during gaming, streaming, or rendering ? Quiet operation powerful cooling without disruptive noise ? Easy installation pre-filled, sealed, and ready for use ? Protect your CPU genuine EVGA design prevents overheating ? Smart thermal monitoring dynamically adjusts fans for optimal cooling ? Wide compatibility works with Intel and AMD sockets for most builds ? Premium aesthetics sleek black finish with LED lighting enhances your system

Call to

Action ? Maximize CPU cooling efficiency and enjoy quiet, reliable performance get the EVGA CLC360 AIO 360mm Cooler today!
