ZOWIE XL2566K, 24.5", 1920x1080p, 360Hz, 0.5ms (GtG), DyAC T

SKU / Model: ZOW-XL2566K

Product overview

ZOWIE XL2566K 24.5 Inch XL2566K is the flagship model that offers competitive gamers optimized smoothness and fast response, as well as its many customizable features that will help amateurs and pros alike to perform to the best of their best abilities. With the exclusive DyAc+ technology on top of 360Hz refresh rate on a TN panel, XL2566K provides an overall clearer motion clarity than the market s offerings in its class. Motion Clarity DyAc+ on XL2566K makes vigorous in-game actions such as spraying more clear than DyAc+ on XL2546K. The clarity helps gamers see the position of the enemy during fast movements or fast moving targets more easily and notice the bullet trajectory more clearly which can help with recoil control and aim. Clarity / Sharpness Compared to typical IPS 360Hz displays, DyAc+ on a TN 360Hz panel provides clearer and sharper outlines of overall moving images, helping you focus and have less distractions from the unwanted afterimage of the motions in-game. Smoothness Catch every detail of motion and enjoy the most fluid gameplay by ZOWIE native TN 360Hz refresh rate monitor, which ensures a flawless view of fast-motion consistently. Convenient In-game XL Setting to Share Share your own settings with a teammate, friend, or your fans. Save video profiles quickly and share conveniently through a simple user interface. Color Mode by Game Titles Color settings are very subjective and will vary by game. Get the suggested Color Mode settings ZOWIE s team of players often come back to when playing different games. Apply with XL Setting to Share and fine-tune to your own preferred color setting that fits you the most. Quick Access Settings The change to the user interface and the new 5-way S Switch is more than just cosmetic. The redesigned interface provides you the ability to customize which FPS settings you would like to access quickly via quick menu, and then allows you to access them with one-touch. Setting up before games or during rounds is now much more convenient. Smaller Base and More Playing Space Monitor base is designed to take up less space while maintaining the same stability. This allows gamers more space in their setup for in-game movements and allows them the flexibility to make adjustments and play comfortably. Fluid & Flexible Adjustment We understand that each player has his/her own unique combination of monitor height and angle adjustment. With height adjustment & free tilt, players are able to setup quickly and conveniently resulting in a more comfortable playing environment.
